

360° Pole Banners

Item #: PB360N

Slide the plastic hoops through the top and bottom hems of your decorative pole banner. Snap the hoops together around the pole, tree or column. Zip up the pole banner. The banner is held in place by attaching the plastic cable tie through the three straps around the pole and tightening.

If it is used as a windsock, simply slide the hoops through the hems and snap the hoops together. Attach the plastic cable tie through the four straps. Zip up and hang where desired.

Warning: Remove pole banners during high winds. Make sure that pole banners are dry before storing.
