

Grommetted Flags

- On most of our flagpoles, there is a way to attach the flag at the top of the pole. It is usually a clip, which you would attach to the top grommet.
- On the bottom, we recommend using a flag-mounting ring (item # PVCRO2, not included) for grommet attachment. A cable tie or a piece of string can also be put through the bottom grommet to secure it to the pole.
- Please consult your local flag dealer for flag attachment hardware.
