

# Economy Blade and Teardrop Flagpole Instructions

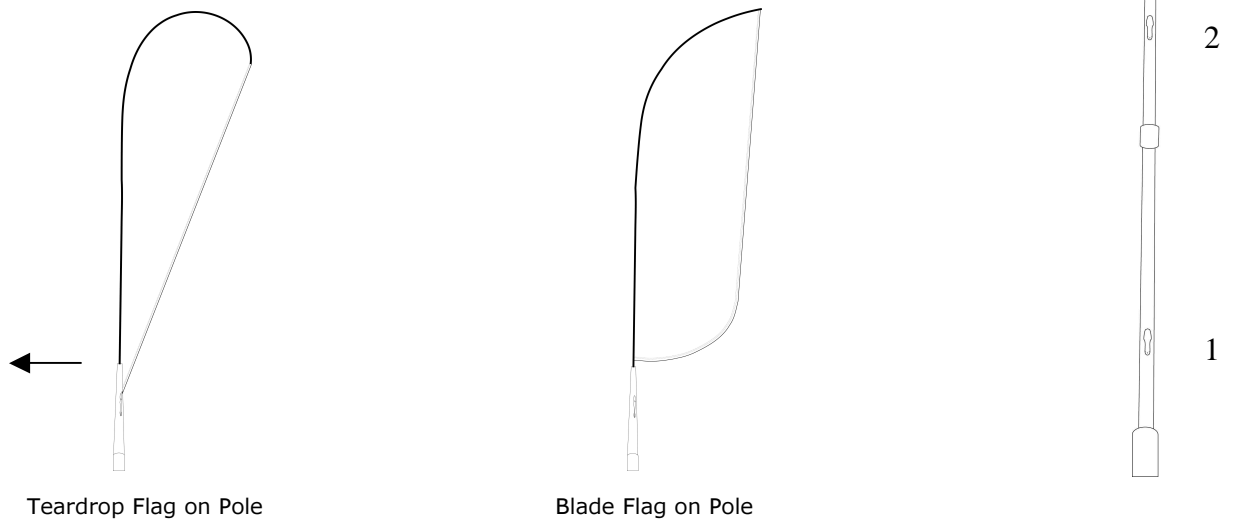

Item #: EBT999

There are five pole sections for assembly. Always start with the largest pole section (Section 1). This piece is the bottom of the pole. Each section of the pole slides into the next from largest to smallest until the pole is completely assembled. If you would like a smaller pole you may remove Section 2. Section 1 will fit securely into Section 3.

Remove the bungee cord from the mesh pocket on the inside of the carrying case. This is needed for flag attachment.

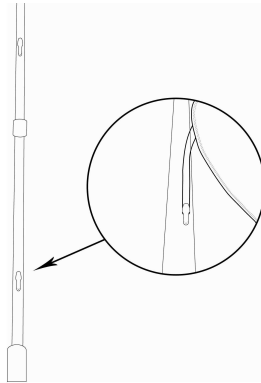

Slide the sleeve of the flag over the top of the pole. The pole will then bend to take the shape of the teardrop or blade flag.

Teardrop Flag on Pole

Blade Flag on Pole

Loop the bungee through the tab on the bottom of the flag. Tighten the bungee to provide enough tension for the flag to arch. Tie the bungee cord to one of the clips located on pole Section 1, 2 or 3 to secure it in place.

Insert the ground spike into the ground. Place the rounded collar over it to help to stabilize the pole.
